EDUCATION

California Polytechnic State University-San Luis Obispo San Luis Obispo, CA
Bachelor of Science in Computer Science Sep. 2023 – June 2027

EXPERIENCE

Public Health Intern — June 2024 – July 2024
SFDPH - Population Health Division — San Francisco, CA
- Assisted in the collection and analysis of public health data, contributing to the development of strategies for improving community health outcomes
- Developed a mock community assessment project to apply and demonstrate understanding of public health evaluation techniques and data analysis
- Gained in-depth knowledge of public health policies, programs, and practices through hands-on experience with the Population Health Division

Barista — April. 2021 – Oct.2023
Starbucks — San Francisco, CA
- Collaborated with team members to maintain efficiency in food and beverage preparation
- Ensured compliance with food safety regulations and cleanliness standards
- Provided exceptional customer service to ensure customer satisfaction and customer retention

Technology Intern — June 2023 – August 2023
Each One Teach One — San Francisco, CA
- Designed a functioning professional website for the non-profit ISSASF (Information Systems Security Association San Francisco Chapter)
- Developed proficiency in Python, HTML, CSS through hands-on coding projects
- Utilized VS code and Github for version control and collaboration

Intern — July 2021 – August 2021
Code Tenderloin — San Francisco, CA
- Acquired foundational skills in web development using HTML and CSS
- Adapted to remote work environment and effectively communicated with peers
- Demonstrated effective communication skills by sharing personal stories and goals through the creation of a personal website integrating technical training and soft skills

PROJECTS

Jigsaw Puzzle | *GDScript, Firebase* — June 2024 – September 2024
- Developed an interactive jigsaw puzzle game tailored for seniors using Godot, focusing on accessibility and user-friendly interface
- Implemented features such as adjustable difficulty levels and customizable puzzle sizes to cater to varying levels of cognitive and visual ability among senior users
- Integrated Firebase as the backend database to manage user progress, store puzzle data, and facilitate real-time updates and interactions

SLO Hacks | *Python, Flask, HTML, CSS, JavaScript* — May 2024
- Co-founded Poly Exchange with a team of three other members, creating an online marketplace dedicated to facilitating the exchange of used goods and services among students, promoting cost savings and sustainability
- Collaboratively developed and launched Poly Exchange platform, enabling users to register, list items, and connect for transactions, ensuring a seamless user experience across front-end and back-end functionalities
- Successfully delivered a polished final product in less than 24 hours with a focus on usability and aesthetic appeal, leveraging Flask framework expertise gained during development
